

TIRE PRESSURE INDICATOR CAPS

TC Series

- ◆ **Easy Use:** The product will save your time in the troublesome checks prior to the driving as you are only asked to do is secure the tire pressure cap onto the air intake and look into the sight to check for color variation which will indicate whether your tire pressure is at a normal level. Dear driving ladies, once you have this valve cap on your automobile, it will make you become a skilled inspector for the pre-driving checks.
- ◆ **Optimal Safety:** The gauge cap is provided to remind you from time to time whether to inflate the tire or the tire suffers damage from external force, so as to drive down accidents rate in high-speed driving or in emergency. With this gauge cap, you will enjoy enhanced protection in your driving.
- ◆ **Upgraded rigidity:** our valve caps may be used in all weather conditions as it is built by material of high insulation with water, oil proof properties. The casing has undergone a multi-ply rust proof treatment for it to last as long as quality tires for a period of some 1.5 years. The product may be used repeatedly after inflating the tire.
- ◆ **Savings:** Have you ever suffered damaged tire because of pneumatic factors? From now on, at a minimum expense, you will enjoy more benefits and enhanced safety and without this valve caps, you might be involved in large sum of maintenance expense. Regular service may be essential to automobile driving, but the pre-driving visual check will surely bring you with more protection.

Reference values for tire pressure of different vehicles/automobiles:

COMPACT	800-1200 cc	26-30 psi		
SPORTS CAR	1200-3000 cc	26-30 psi	3000-5000 cc	32-36 psi
STATION WAGON	1200-2000 cc	28-32 psi	2000-5000 cc	32-40 psi
SEDAN	1200-3000 cc	26-32 psi	3000-5000 cc	32-40 psi
JEEP	1600-3000 cc	26-32 psi	3000-5000 cc	32-40 psi

SAFE

Under standard tire pressure, see-through window displays green, signaling that car users can be normally driving.

CAUTION

As pressure is 20% below standard, see-through window displays yellow/green, signaling car users to inflate tire for safe driving.

DANGER

As pressure is 25%~30% below standard, see-through window displays yellow/red/green, signaling car users to immediately check and inflate for safe driving.

The applicable tire pressure scope for the cap is marked on top of the window **from 26 psi to 80 psi**.

Please opt for the pressure indicator cap that does match the pressure of your tire. This product is reusable within the pressure scope marked.
